In the Claims

30 1. (Amended) A rock crusher comprising:

[crusher including an oscillating cone] a conical shaped bowl,  
a cone mounted for oscillating movement within [a] the conical  
shaped bowl, said [wherein the] bowl [is] being vertically  
adjustable relative to the cone for crushing rock to specific  
sizes; [, said rock crusher comprising:]

35 a frame including an annular bowl support, [a] said bowl  
adjustably supported within said annular bowl support for vertical  
adjustment of the bowl relative to the cone;

said vertical adjustment provided by mated screw threads on  
said support and said bowl, the screw threads on one of the support
